240901004 text file.ipynb

```
In [1]: import pandas as pd
df=pd.DataFrame()
print(df)
```

Empty DataFrame
Columns: []
Index: []

```
In [2]: emp = pd.Series(['Parker', 'John', 'Smith', 'William'])
id=pd.Series([102, 107, 109, 114])
frame = {'Emp': emp, 'ID': id}
result = pd.DataFrame(frame)
print("\nSeries to Data frame\n")
print(result)
```

Series to Data frame

	Emp	ID
0	Parker	102
1	John	107
2	Smith	109
3	William	114

```
In [4]: print("\nAdding new column:\n")
result['Age']=pd.Series([35,24,40,38])
print(result)
```

Adding new column:

	Emp	ID	Age
0	Parker	102	35
1	John	107	24
2	Smith	109	40
3	William	114	38

```
In [5]: print("\nDeleting one column:\n")
del result['Age']
print(result)
```

Deleting one column:

	Emp	ID
0	Parker	102
1	John	107
2	Smith	109
3	William	114

```
In [6]: print("\nExtracting the third row:\n")
print(result.loc[2])
```

Extracting the third row:

Emp	Smith
ID	109

Name: 2, dtype: object

```
In [7]: print("\nSlice rows:\n",result[1:3])
```

Slice rows:

	Emp	ID
1	John	107
2	Smith	109

```
In [8]: d2=pd.DataFrame([['Dale',123],['Mark',143]],columns=['Emp', 'ID'])
print("\nAdding new row values:\n",result.append(d2))
```

Adding new row values:

	Emp	ID
0	Parker	102
1	John	107
2	Smith	109
3	William	114
0	Dale	123
1	Mark	143

C:\Users\DELL\AppData\Local\Temp\ipykernel_2412\1753680200.py:2: FutureWarning: The frame.append method is deprecated and will be removed from pandas in a future version. Use pandas.concat instead.
print("\nAdding new row values:\n",result.append(d2))

```
In [9]: print("\nDeleting particular row:\n",result.drop(1))
```

Deleting particular row:

	Emp	ID
0	Parker	102
2	Smith	109
3	William	114
